

LIFTING MAGNET FOR 400 KG DIAMETERS

Article N° 1 110

Supplier : **ALFRA**
Type : **TML 400 R**

State of the article : **6.0 New**

Number :

Features of TML 400 R:

Lifting of tubes from 50 mm to 400 mm diameter
Exceptional performance on thin materials (Usable from 2 mm)
360 ° rotating and tilting load whirlpool
Completely innovative, this new concept of use makes it possible to benefit from an extended range of action.
Magnetic grip surface reinforced with a TiN coating
Technical characteristics of the TML 400 R:

Empty weight: 8.2 kg
Tear resistance: 400 kg (in S235 steel, 6 mm)
Max. Load capacity of round tubes: 20 - 50% of flat material (comparatively TML 500), depending on tube diameter and material thickness
Length: 295 mm (lever down), width: 118 mm, height: 216 mm (lever up)
